

# Gain Control with ExtraHop

Unprecedented speed to insights so you can achieve more.

More clicks = More of your time lost

When it comes to resolving issues and improving performance in your environment, it's really a race against time. Every second you spend on one investigation is time that's lost to address other priorities.

## At-a-Glance

### Changing the game

- Utilize behavioral analysis and real-time visibility to start your investigations.
- Big Insights. Delivers a complete view of terabytes worth of data that can be refined to the source in 5 clicks.
- Streamline your workflow with a seamless interface and correlation across all platform functionality.
- No more guess and check packet analysis that is frustrating and time consuming.

## Did You Know?

All it takes is a few clicks to get the answers you need. ExtraHop can get you from a global view to the exact transaction you need in just a few clicks.

## A platform that works as smart as you do

### Discover Everything Happening On Your Network

**A global view with deep insights allows you to detect and solve most problems**

- Agentless auto-discovery and classification of IT assets for a complete view
- Massive scale and breadth of data curated to become actionable
- Dynamic operational dashboards customizable to fit your workflow

### Explore Every Interaction

**Simple, rich, customizable analytics and search to dig into persistent issues**

- Real-time insights for IT, security, and the business
- Powerful and easy to use analytics capabilities allow anyone to benefit
- Ad-hoc correlation of all data in flight

### Trace Down The Details

**Start with or drill down to individual users, metrics, or packets to simplify investigations**

- Provide definitive data for better decision making
- Drastically reduce the time to answers with an integrated workflow
- Eliminate dead-ends by filtering and searching before extracting packets

### Command Of All Environments

**Gain visibility across data centers, the cloud, and remote sites**

- Extend visibility to the edge and escape your data's gravity
- Consolidate or correlate analytics across sites
- Manage it all centrally to improve operational efficiency

## Lets talk better outcomes, not more technology

### Rapid Service Delivery and Restoration

When you're just clicks away from what is causing trouble, you can restore service before it substantially impacts the organization.

### Proactive Security & Incident Response

Detect and respond to suspicious behavior in real time and locate compromised systems and threat vectors before they become a major incident.

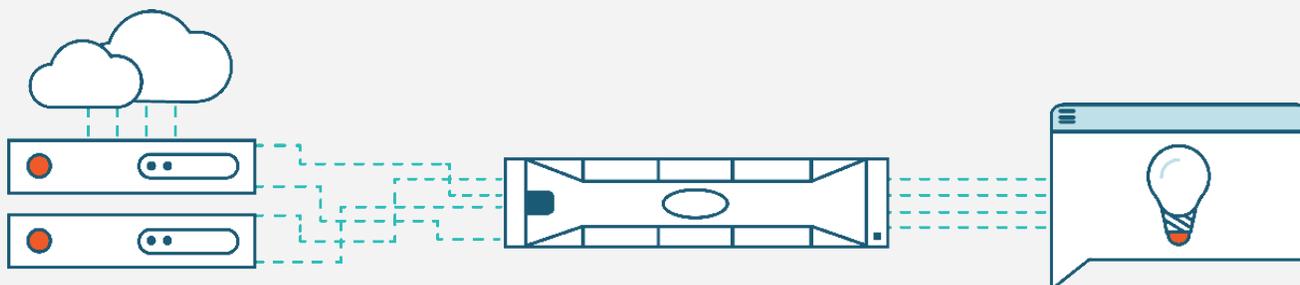

### Optimal End User Experience

Ensure that your systems are always operating as they should with real-time end user monitoring to avoid incidents where customers notice degradation before you do.

### Better Alignment of IT and the Business

Use the data flowing through your network to strengthen and differentiate your core business, opening up new paths to revenue.

## About ExtraHop

ExtraHop makes real-time data-driven IT operations possible. By harnessing the power of wire data in real time, network, application, security, and business teams make faster, more accurate decisions that optimize performance and minimize risk. Hundreds of organizations, including Fortune 500 companies such as Sony, Lockheed Martin, Microsoft, Adobe, and Google, start with ExtraHop to discover, observe, analyze, and intelligently act on all data in flight, on-premises, or in the cloud. To experience the power of ExtraHop, explore our interactive online demo. Connect with us on Twitter, LinkedIn, and Facebook.
